

BARKU

PAD CLIMATE SYSTEM

for evaporative cooling

✓ No corrosion

All parts are made of uv-resistant PVC or stainless steel.

✓ Big Trough

The water gutter contains all the water the system needs. No external water tank is required.

✓ Perfect Distribution

Ideal water distribution across the whole system with the special deflector shape.

✓ Quick and easy installation

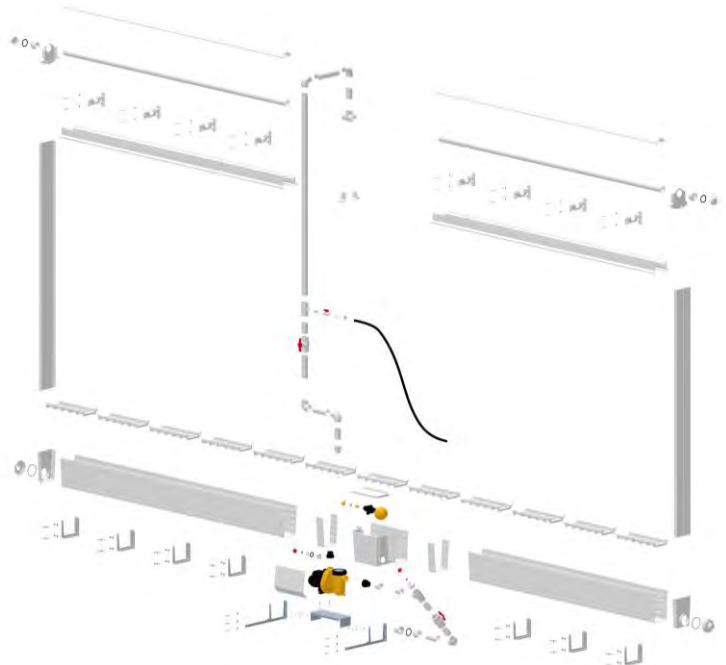

Set up is flexible in height and length up to 10 ft x 140 ft.

✓ Durable components

Durable system components with sturdy construction allow for long-lasting deployment without interruptions.

✓ Excellent cooling capacity – design is patented!

The special deflector layout ensures perfect water distribution all through the Pad. This allows perfect wetting, less splashing water, and therefore excellent cooling capacity.

Typical Applications

- ✓ Poultry farms
- ✓ Pig farms
- ✓ Green houses
- ✓ Warehouses
- ✓ Domestic comfort cooling
- ✓ Air humidifying
